

DOUBLE GLAZING – INSULATING GLASS

Double Glazed Units are manufactured from two or more panes of glass held apart by a spacer and bonded with a seal, trapping dehydrated air between the glass panes. Their primary function is to improve the thermal insulating properties of window glazing, as well as contribute to safety, security and acoustics.

The appearance and performance of Double Glazed Units can be modified by incorporating different glass types and thicknesses or altering the width of the spacer bar.

Warm Edge Spacer

We manufacture IG units using flexible spacer bars and promote "Warm Edge Technology", which contributes to energy efficient buildings.

The flexible spacer follows the edge of the glass and is a complete insulating glass spacer system which requires only one start and finish joint. It does not allow heat loss transmission through the spacer bar.

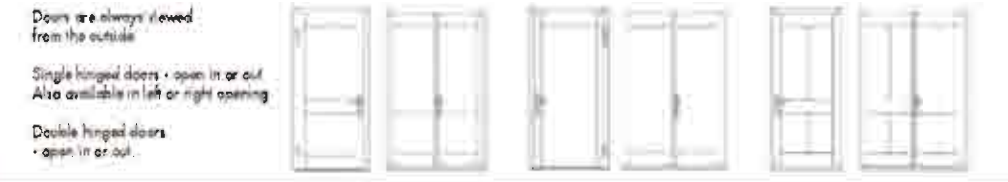

Aluminium Spacer System

A viable alternative option when curved edges and circular shapes are not a specified requirement.

PATIO DOORS

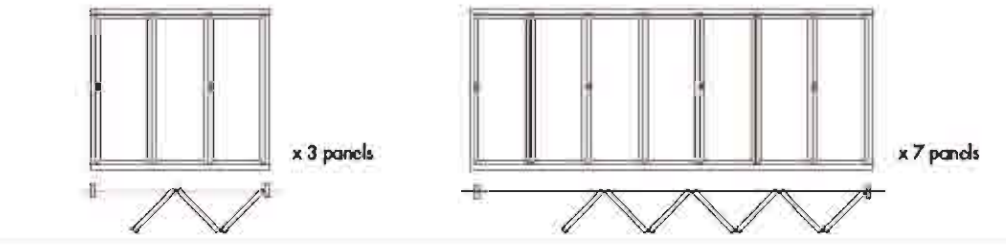

- Eagle Door represents a new generation of aluminium sliding doors.
- Doors with contemporary aesthetic appeal.
- The unique design of the frame joints positively assist in achieving squareness, rigidity and waterproofing.
- Double woolpile sealing of moving surfaces ensures smooth operation, while keeping dust, draughts and rain where they belong - outside.
- Eagle Door truly represents **value for money** with an **aesthetic advantage**.

All doors are made for 2.1m high structural openings and also available in 2.4m high in certain sizes and configurations

OX/XO		OXXO	
	2 panel Eagle Door of structural width: 1.5m 1.8m 2.0m 2.1m 2.4m 2.7m 3.0m		4 panel Eagle Door of structural width: 3.6m 3.6m 4.2m 4.8m 5.4m 6.0m

XXO/OXX	
	3 panel Eagle Door of structural width: 2.4m 2.7m 3.0m 3.6m 4.0m 4.2m 4.5m

Note: 2.4m high sliding doors are only available in certain configurations and sizes.

SLIDING FOLDING DOORS

- Tough, durable sliding-folding door system of high-quality aluminium.
- Designed to meet the high standards of urban residential projects.
- Fully weather resistant with easy sliding, folding action for South African conditions.
